The screenshot shows the Wixie interface for a project titled "Frog's Life Cycle Journal". The interface includes a top navigation bar with a home icon, the project title, and buttons for "Text", "Image", "Video", "Team", and "Show". Below the navigation bar is a "File" menu and an "Edit" button. On the left is a storyboard with five pages, each showing a different stage of a frog's life cycle. On the right is a toolbar with various editing tools like a mouse cursor, microphone, eraser, and selection tools. Below the toolbar are sections for "Page Color", "Page Picture", "Presentation", and "Measure".

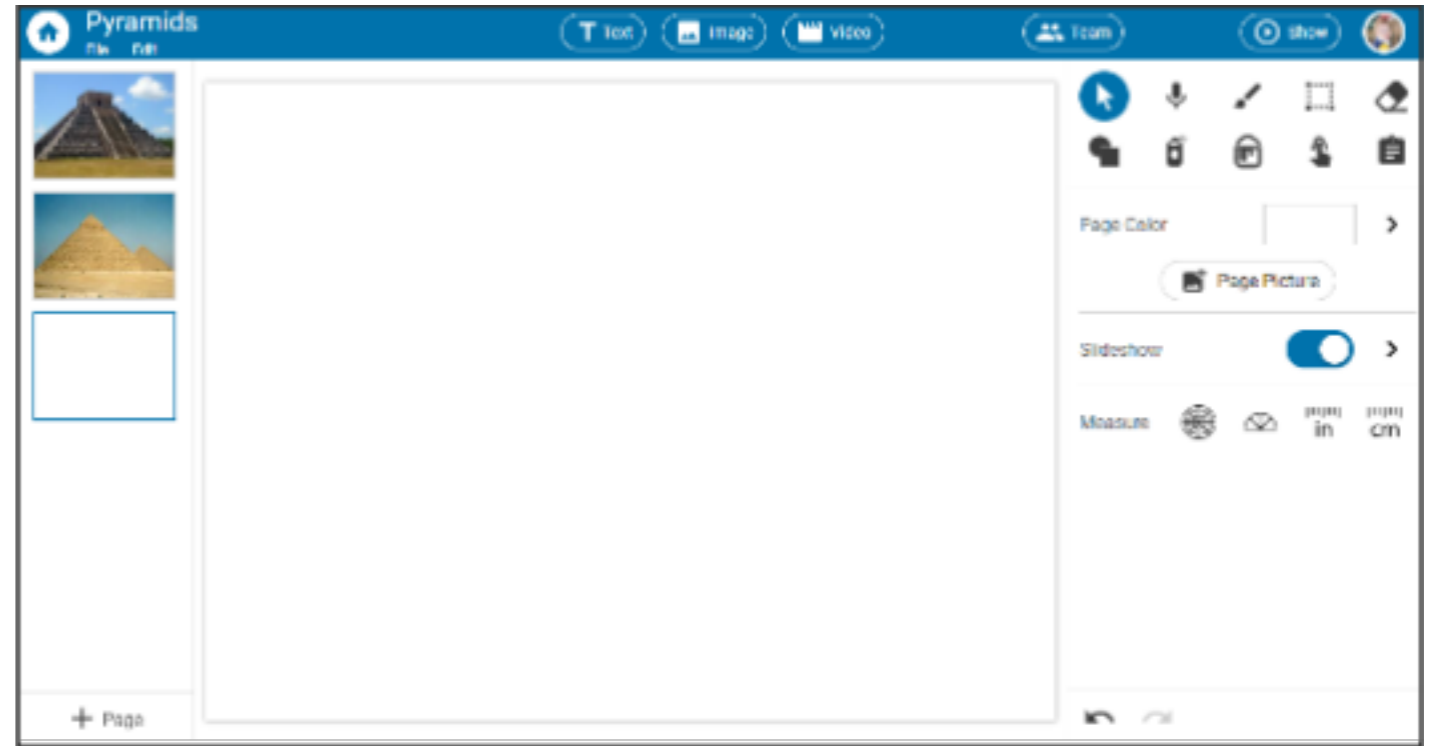

Annotations with arrows point to specific features:

- An arrow points to the "File" menu, which is open and shows options: Share..., Download..., Print... [Ctrl+P], Import Pages..., Mark as Complete, Add to Highlights, and Make a Copy. A text box next to it says: "Use the File menu to share, download, and print projects."
- An arrow points to the storyboard, which shows five pages with frog illustrations. A text box next to it says: "Use the storyboard to add and move between pages in a project."
- An arrow points to the "Show" button in the top right toolbar. A text box next to it says: "View instructions and feedback."

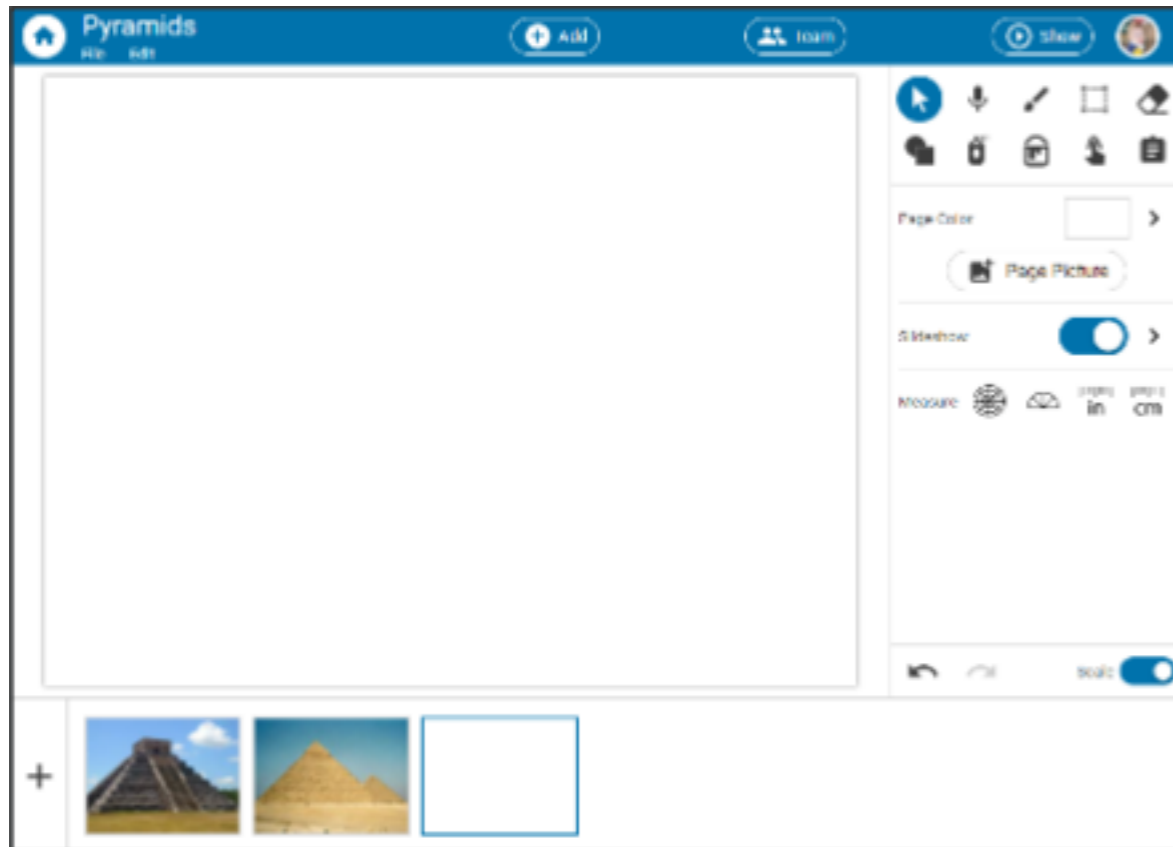

Wixie's interface changes depending on the size and shape of your device or browser window.

Most phones or iPads in portrait mode.

Most Chromebooks and laptops.

Most iPads in landscape mode.

Most Android tablets.
