

Sharing ePubs through Google Drive

If you have a Google account, you can create a Google Drive folder to make is easy to share and distribute studentcreated ePubs.

Open a browser and log into your Google account. Then, open Google Drive.

Create and name a folder you want to use to share your ePub files.

Right-click the folder, choose Sharing from the menu that appears, and select Share.

Invite the people you want to be able to see and edit the folder, such as students who will be uploading and downloading ePubs.

Who	has access		
\$	Public on the web - Anyone on the Internet can find and view	Change	
	Melinda Kolk (you) daveandlindie@gmail.c	Is owner	
Q.	Danielle Abernethy t4ldanielle@gmail.com	Can edit 🔻	×
Inv	ite people:		
E	nter names or email addresses		

You can also click the **Change...** link in the Public area so that anyone can find and download files from this folder, such as family, community, and students from other schools.

This will take you to an additional dialog where you can adjust the settings to be even more specific as to who can see the folder.

Share the URL address to this folder, or to specific files in it, to share student ePubs! If you make the folder public, all files inside with have the same permissions (unless you change them), so you can even link directly to specific ePubs in emails, blogs, tweets, or on your classroom Web page.
